## INDEPENDENT ACCOUNTANT'S REPORT ON APPLYING AGREED-UPON PROCEDURES

The Honorable Maggie Toulouse Oliver  
Secretary of State  
State of New Mexico  
Santa Fe, New Mexico

We have performed the procedures enumerated below, which were agreed to by the State of New Mexico, Secretary of State, solely to assist you in evaluating the accuracy of voting system machine tabulators used in the conduct of the 2016 general election held on November 8, 2016. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of those parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

Section 1-14-13.2 NMSA 1978 and 1.10.23.9A NMAC requires a voting system check for all federal offices, the office of the governor and the statewide elective office, other than the office of the governor, for which the winning candidate won by the smallest percentage margin of all candidates for statewide office in New Mexico. If any of the contests resulted in a winning percent margin greater than fifteen percent (15%), a voting system check in that contest is not required. The winning percent margin in all of the Federal contests was greater than fifteen percent (15%) except the President and Vice President of the United States. The statewide elective office with the smallest winning percentage margin of all candidates for statewide office was the contest for Justice of the Supreme Court. Therefore, we performed the procedures enumerated below for (1) President and Vice President of the United States, and (2) Justice of the Supreme Court.

Our procedures and findings were as follows:

### VOTING SYSTEM CHECK

#### 1. Selection of precincts for the voting system check.

**Procedure** - A list of all voting precincts in the State of New Mexico showing total registered voters for each precinct was obtained from the Office of Secretary of State. A spreadsheet showing the voting precinct, congressional district, total registered voters for each precinct and a cumulative number of registered voters beginning alphabetically with the first Bernalillo County precinct, and ending with the last Valencia County precinct was developed. The county-reported election results were obtained from the Office of the Secretary of State. The required sample of precincts to be tested as provided pursuant to Section 1-14-13.2(B), was randomly selected using a "dice roll" method whereby seven ten-sided dice were rolled and the resulting number normalized so that a particular voter (un-named) could be identified within all the voting precincts in the state. A total of 16 rolls of the dice were needed to select the required number of precincts to be tested.

An analysis of the reported election results determined that seven (7) precincts be selected for President and Vice President of the United States and sixteen (16) precincts for Justice of the Supreme Court. (See Appendix A-1). A public meeting was held in the Secretary of State's conference room in the State Capitol Building Annex at 3:00 p.m. on November 21, 2016, to select the precincts to be included in the voting system check. A copy of the instrument used to capture the selected precincts is included in Appendix A-3 of this report.

**2. Notification of county clerks of the precincts selected for the voting system check.**

**Procedure** - We notified each county clerk of the precincts which were selected within their county that would be subjected to a hand recount. We also provided the methods for reporting the recount back to the auditors and provided tally sheets to be used by the county clerks to report the hand recount. (See Appendix A-2).

**3. Receipt of hand recounts from the affected counties.**

**Procedure** - We received hand recount results from the appropriate counties.

All results were e-mailed to us by the county clerks, with the exception of Bernalillo County. We traveled to Albuquerque to retrieve the Bernalillo County results.

**Finding** - All counties selected for the voting system check provided us with hand recounts for the precinct and races selected.

**4. Analysis of the results of the hand recounts.**

**Procedure** - As the results of the hand recounts were provided to us from the counties, we recorded the results for each precinct separately for election day voting, early in-person voting, and absentee by mail voting. We recorded the voting machine tabulator results for each precinct separately for election day voting, early in-person voting, and absentee by mail voting. We obtained the voting machine tabulator results from each affected county's precinct report provided by the Office of the Secretary of State. We accumulated the results for all affected counties and precincts by contest and analyzed the differences between the hand recounts and voting machine tabulator counts.

**Finding** - We found that there were differences in hand recounts and voting machine tabulator counts resulting in an error rate of 0.094% for the President and Vice President of the United States contest and 0.040% for the Justice of the Supreme Court contest. The reason(s) for the errors cannot be determined, but must result from either incorrect canvass reporting to the Office of the Secretary of State, or errors in the actual hand recounts provided to us by the affected counties. The error rates are considered to be acceptable. A copy of the analysis is included in Appendix B to this report.

**5. Determination of whether additional hand counts are required.**

**Procedure** - We analyzed the results of the hand recounts and voting machine tabulator counts to determine whether further hand recounts were necessary as required by Section 1-14-13.2D NMSA 1978 and 1.10.23.9A(3) NMAC.

**Finding** - Section 1-14-13.2D requires a hand recount of additional precincts for an office if the error rate determined from the original hand recounts is greater than ninety percent of the reported voting machine tabulator contest margin. The analysis included in Appendix B to this report shows that the error rate did not exceed the ninety percent test in any of the contests audited. Therefore, no additional recounts are required.

**Other Matters Noted**

Included in Appendix C to this report are documents that report the results of the voting system check by precinct and mode of voting. Bernalillo, Dona Ana, Eddy, Lea, and Luna counties results were for precincts included in voting convenience centers, while Cibola, Santa Fe, and Torrance county results are reported in a precinct location.

We were not engaged to and did not perform an examination, the objective of which would be the expression of an opinion on the accuracy of voting system machine tabulators used in the conduct of the 2016 general election held on November 8, 2016. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the use of the State of New Mexico, Secretary of State, and should not be used by those who have not agreed to the procedures and taken responsibility for the sufficiency of the procedures for their purposes.

## **APPENDIX B**

SECRETARY OF STATE  
 2016 GENERAL ELECTION (1,492 precincts statewide)  
 SUMMARY ANALYSIS of MACHINE COUNT vs. HAND COUNT OF 16 PRECINCTS SELECTED FOR VOTING SYSTEM CHECK (including error rate)

Contest	Number of Precincts Audited	Total Votes		2nd Place Votes		1st Place Votes		Error Rate	Reported Statewide Contest Margin	90% of Statewide Contest Margin %	Additional Testing Required Yes or No
		MTV	HTV	M2	H2	M1	H1				
President and Vice President of the United States	7	4,249	4,249	1,705	1,702	2,072	2,073	0.094%	8.189%	7.370%	No
Justice of the Supreme Court	16	10,091	10,091	4,152	4,150	5,939	5,941	0.040%	4.020%	3.618%	No

**Legend**

MTV: Votes cast for the office in the sample as reported by the vote tabulators

HTV: Votes cast for the office in the sample as reported by the hand recounts

M2: Vote tabulator counts in the sample for the second place candidate

H2: Hand recounts in the sample for the second place candidate

M1: Vote tabulator counts in the sample for the first place candidate

H1: Hand recounts in the sample for the first place candidate

$$\text{Error rate} = \left( \frac{M2}{MTV} - \frac{H2}{HTV} \right) - \left( \frac{M1}{MTV} - \frac{H1}{HTV} \right)$$

or stated simply: the change in the second place vote percentage (machine versus hand count) minus the change in the first place percentage (machine versus hand count)

Reported Statewide Contest Margin: Statewide results reported by the counties to the Secretary of State

Additional testing required if the error rate is greater than 90% of the reported statewide contest margin - NONE REQUIRED
